

**G & T YEAR 9
MATHS – FUTURE HOUSE
FRIDAY 1ST JULY 2011**

MY EVALUATION

I took twelve girls to the above event where they did lots of crazy mind bending activities using numbers and shapes. I was so out of my depth and yet here were our year 9 girls among about 50 others of the same age and they were so engaged and up for it and not in the least bit scared.

I spent most of the time hoping I was not going to get picked on to answer a question, this is just how I was in Maths lessons all those years ago. It made me wonder about retaking my GCSE Maths but I soon talked myself out of that one.

The girls had an enjoyable day where they were able to collaborate with others and communicate their findings effectively. They developed skills in exploration, interpretation and explanation whilst enhancing their analytical and strategy skills.
